

(1.) Reverse LL
i/p

5 → 4 → 3 → 2 → 1
↑
head

o/p
1 → 2 → 3 → 4 → 5
↑
head

Diagram illustrating the reversal of a linked list using a loop:

```

graph LR
    null --> 5
    5 --> 4
    4 --> 3
    3 --> 2
    2 --> 1
    1 --> null
    
```

Initial state: null ← 5 → 4 → 3 → 2 → 1 → null. head points to 5. temp points to 5. prev is null.

while (wr != null) {

1. temp = wr → next
2. wr → next = prev
3. prev = wr
4. wr = temp

head = prev

Final state: null ← 5 ← 4 ← 3 ← 2 ← 1 → null. head points to 1. prev points to 1. wr points to null.

2. Sorted Linked List

head1
↓
1 → 3 → 5 → 7

2 → 4 → 6 → 8
↑
head2

o/p

1 → 2 → 3 → 4 → 5 → 6 → 7 → 8
↑
head

Diagram illustrating the merging of two sorted linked lists:

```

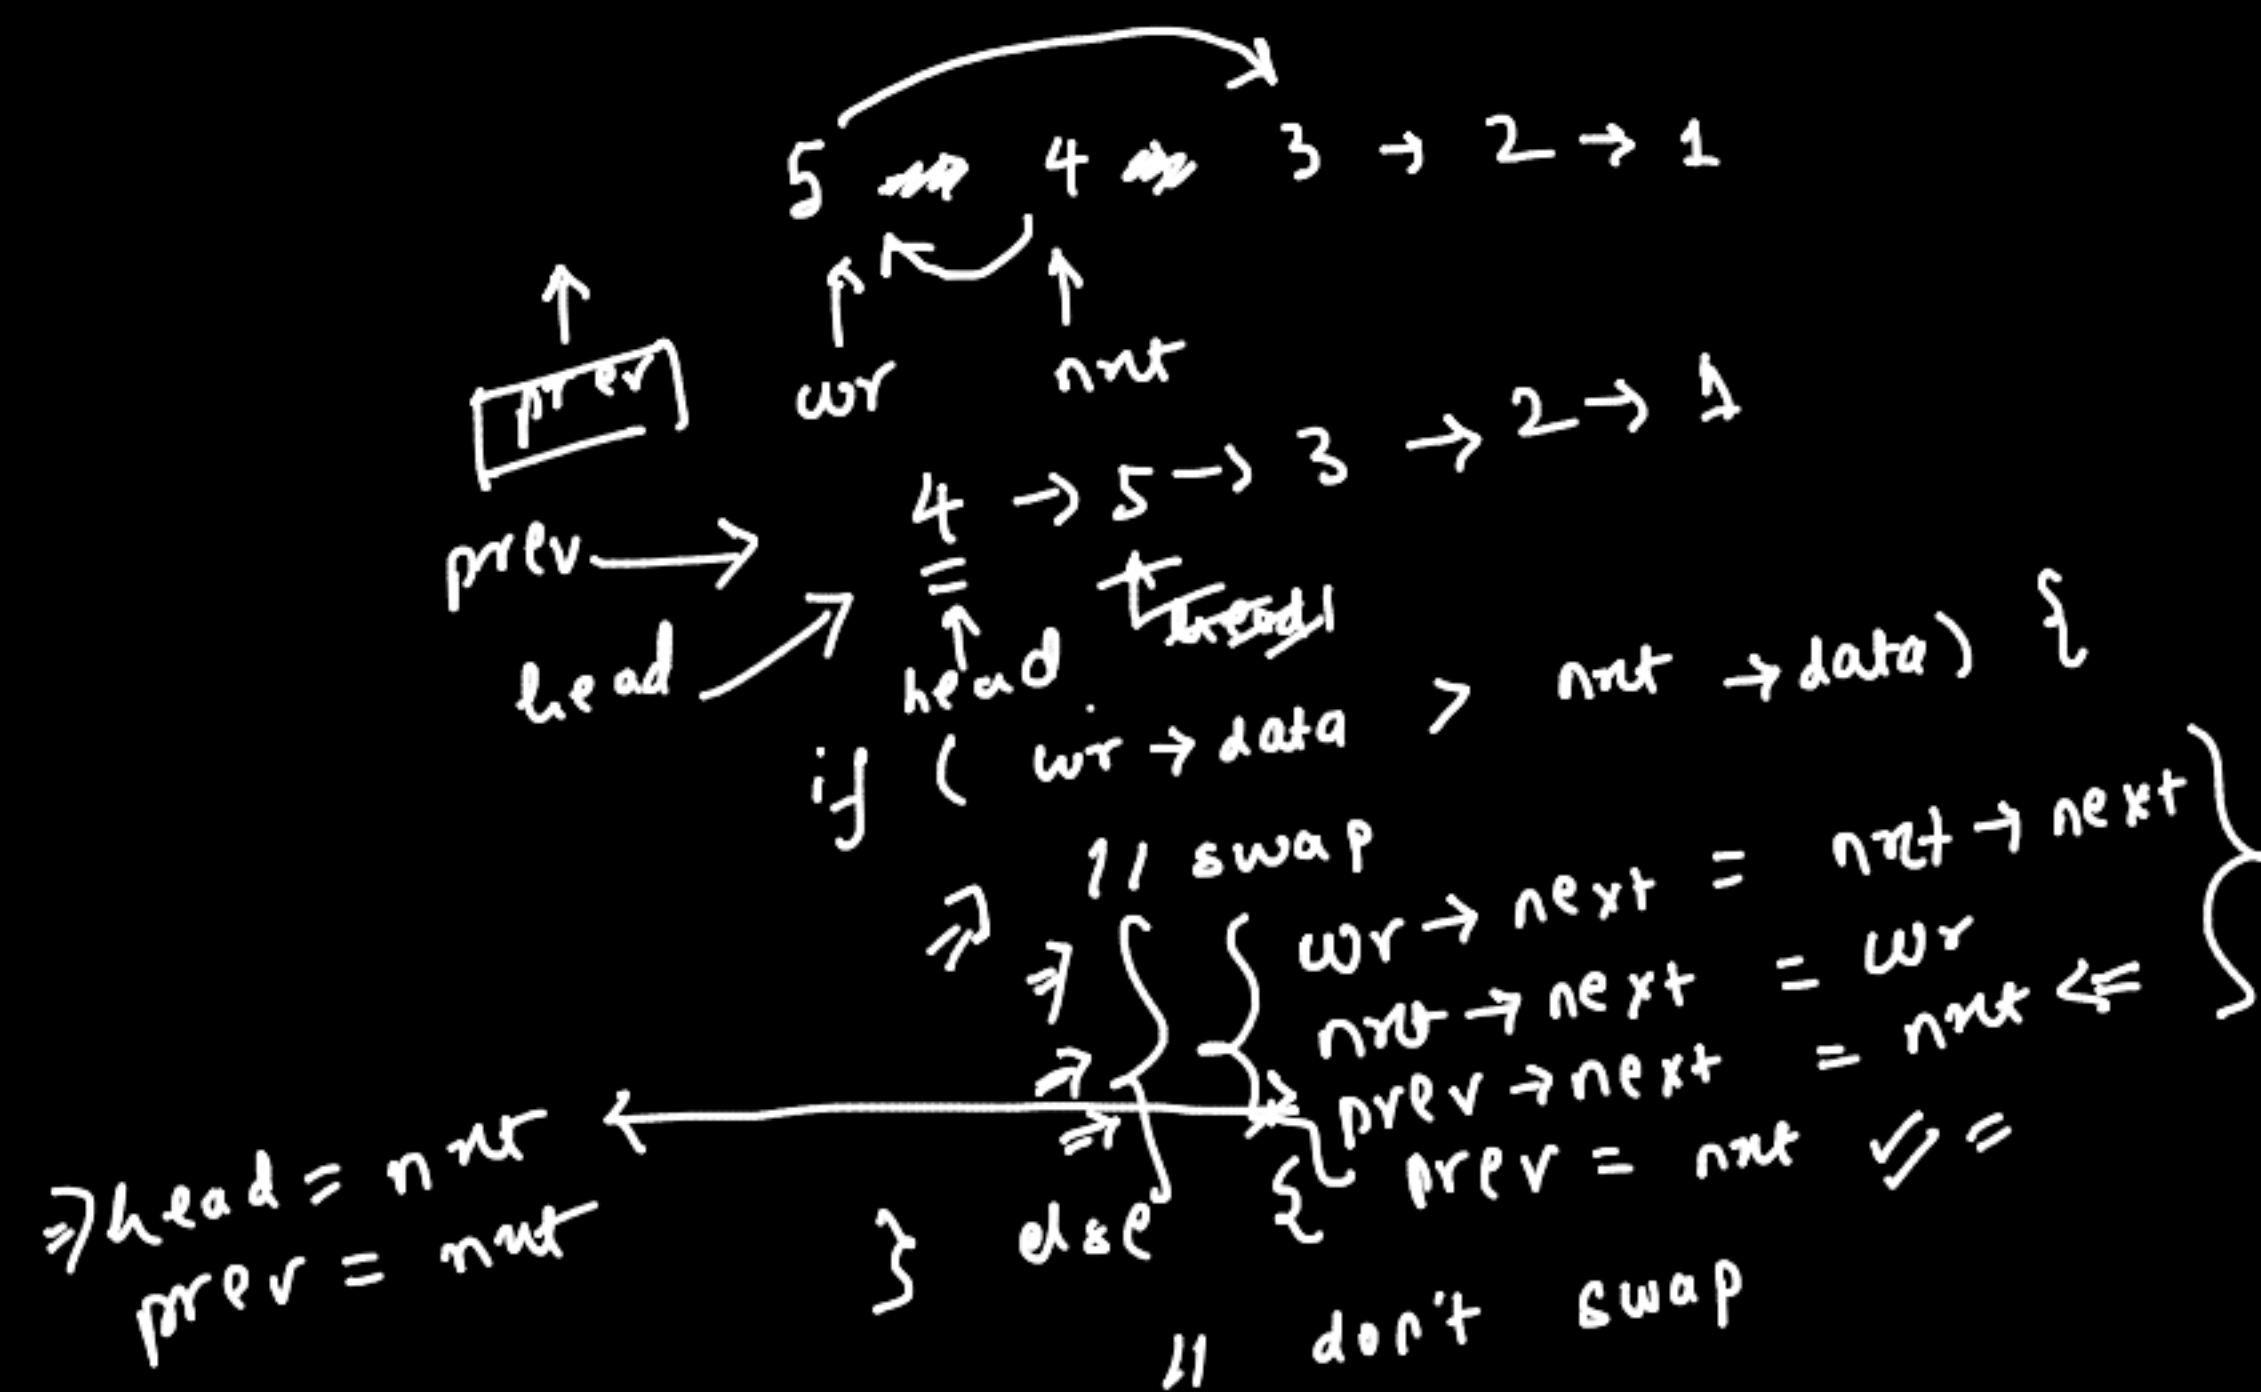

graph LR
    head1 --> 1
    1 --> 3
    3 --> 5
    5 --> 7
    head2 --> 2
    2 --> 4
    4 --> 6
    6 --> 8
    
```

3 → 5 → 7

2 → 4 → 6 → 8

Final merged list: 1 → 2 → 3 → 4 → 5 → 6 → 7 → 8
o/p

3. Merge Sort
